

ONKOLO HIDE

a unique experience

Home to
Namibia's first
**immersive wildlife
listening experience**,
allowing guests to discover
not only what the bush
looks like, but what it
sounds like too.

The Namibian bush takes on a new perspective when you sit quietly and observe wildlife without having an obvious presence. Wildlife hides offer one of the best ways to get exceptionally close to animals, providing unrivalled opportunities for photography, birdwatching and quiet observation.

At Onguma's Onkolo Hide, the experience goes beyond what you can see. Onkolo Soundscapes is a unique, immersive audio experience that uses discreetly positioned microphones to reveal the subtle sounds of the wilderness in remarkable detail. Hear birds calling in the distance, insects hidden in the grass and the gentle footsteps of wildlife approaching the waterhole. Together, the visual and auditory experience creates a deeper connection with the African bush.

ACTIVITY

- Depart from your lodge with one of our experienced nature guides at a time arranged with your guide.
- The guide will remain with you throughout the duration of the visit.
- Experience Onkolo Soundscapes, an immersive listening experience that reveals the hidden sounds of the African bush through a specialised microphone system.
- Learn about the fascinating behaviour of birds and mammals as they come to drink at the waterhole.
- Enjoy up-close wildlife viewing and exceptional photographic opportunities.
- Duration: approximately 2 – 2.5 hours
